

# Healthcare IT Solutions

## **Advance2000. Delivering Increased Productivity.**

Today's healthcare is transforming faster than ever. Higher standards in patient care, new government mandates, and the need for greater efficiencies are driving the industry to adapt and change. By utilizing the most innovative information technologies, Advance2000 offers solutions that transform traditional institutional care into proactive, patient-centered healthcare.

### **Telemedicine Solutions**

Advance2000 can help eliminate distance barriers for hard-to-reach patients while still providing human interaction through our video and mobile solutions.

### **Voice & Network Solutions**

Advance2000 offers a comprehensive suite of voice and data solutions and services to meet the demands of healthcare institutions of all sizes.

### **Innovative Partnerships and Solutions**

Through new business development efforts and partnerships, Advance2000 offers innovative solutions to the healthcare industry such as:

- Event Management System
- Real Time Location Services (RTLS)
- Infection Control Surveillance
- High Definition Video Telemedicine
- Bedside Multi-Media Devices

With the combined resources of our partners and experienced engineers, Advance2000 provides services and solutions tailored specifically to help healthcare organizations improve patient care.
