

**KNOWLEDGE LEVERAGES YOUR CAPABILITIES.  
TAKE THE CHALLENGE, ASSESS YOUR IT TODAY.**

## THE STARTING POINT

A successful IT system is a critical component of your business. Our IT Assessment evaluates four key areas. We provide a comprehensive assessment of your system's capabilities, efficiency, security, and overall design to make recommendations that align IT best practices with your business objectives.

## THE ADVANCE2000 VALUE

Our certified systems engineers will leverage industry best practices to develop a holistic IT strategy to faster innovation and higher productivity. By optimizing and aligning IT with your business goals we will create a roadmap for greater efficiencies.

## A GOAL WITHOUT A PLAN IS JUST A WISH

An IT Assessment will provide insight on your business' strengths and weaknesses. Our goal is to reduce your risks, improve your return on investment and deliver better service at a lower cost.

- Reduce risk to ensure security, compliance, and resiliency across the enterprise
- Improve ROI by unlocking business value from IT
- Boost end-user satisfaction while taking advantage of new technologies

## SERVICE AREAS

- Network Infrastructure
- Servers
- Workstations
- Backup/Storage
- Email
- Security
