

PRIVATA

Your data. Private.

Private secure collaboration
and control of your data.
We empower you to collaborate
with others more securely and
efficiently from anywhere.

What is Privata?

Privata is a secure private content collaboration platform that gives organizations full ownership, visibility and control over their data. Teams can share files, collaborate in real time, and manage documents from any device - without exposing their information to public cloud providers.

Unlike traditional file-sharing services, Privata is hosted in a private cloud, ensuring content is stored within your organization's control, protected by enterprise-grade security, auditing and policy management.

Key Benefits

- Full Control of Your Data
- Private Cloud Security
- Real-Time Co-Editing
- Advanced File Permissions
- Enterprise User Management
- Audit Trails & Compliance Support
- Anywhere Access - Mobile, Desktop, Web

Secure File Sharing & Access Control

- Share individual files or folders with selected users, groups, or teams
- Create public links for view/download or upload-only "file drop"
- Secure View Mode: restrict download, print, and copy to protect content
- Password protection & expiration dates for shared links
- Prevent unauthorized re-sharing with controlled permissions
- Granular rights: read-only, edit, upload, share per file/folder
- Full audit log and activity monitoring (shares, downloads, edits)

Collaboration & Workflow Management

- Commenting, tagging, version history & restores
- Shared content appears automatically in the user's workspace
- Add descriptions or notes to link shares to provide context
- Corporate File Templates ensure branding consistency
- Custom dashboards with widgets (tasks, recent files, announcements)
- File & folder reminders and notifications to prevent missed deadlines
- Favorites panel for quick access to important content
- DocuSign integration for secure e-signatures directly from Privata

Built-In Office Editing

- Real-time co-editing in browser
- Support for DOCX, XLSX, PPTX, ODF/ODT formats
- Version history, comments, track-changes
- Secure document handling & password protection
- Collaborate like Microsoft 365, without putting files in the public cloud

Accounts & User Management

- Add and manage users from a simple web-admin interface
- Assign roles: super-admin, group admin, standard user
- Group-based policies and permissions
- User & group storage quotas with overrides
- Disable accounts without losing data
- Integrates with Active Directory / LDAP for seamless onboarding

Access from Any Device

Web

- Secure access through any browser

Windows Desktop Client

- Sync folders to local machine
- Work offline; sync automatically once online
- Selective sync to save space
- File status alerts & locking support to avoid conflicts

Mobile

- Mobile-friendly web access today
- Dedicated mobile apps coming soon

Accounts & User Management

- Add and manage users from a simple web-admin interface
- Assign roles: super-admin, group admin, standard user
- Group-based policies and permissions
- User & group storage quotas with overrides
- Disable accounts without losing data
- Integrates with Active Directory / LDAP for seamless onboarding

Enhanced Security & Identity Management

- Multi-Factor Authentication (MFA/2FA)
- Active Directory / LDAP integration
- Private cloud hosting with strict access control
- Complete audit trail visibility for compliance (HIPAA, SOC, ISO, etc.)
- Encrypted data storage and transmission

Ideal for Industries That Value Security

- Healthcare
- Legal
- Government
- Accounting
- Architectural & Engineering
- Enterprise Security-Sensitive Teams

Privata vs. Traditional File-Sharing Services

Feature	Privata	Public Cloud Products
Data Ownership	Private	Vendor-Controlled
Hosted In	Private Cloud/Data Center	Multi-Tenant Public Cloud
Audit Visibility	Full	Limited
Secure View (No Download)	Yes	Partial/No
Offline Sync + File Locking	Yes	Partial
AD/LDAP Integration	Yes	Varies
Public Links + File Drop	Advanced	Basic
Costs Less	Yes	No
