

## Advance2000 AI Audit

Is AI Still a Question Mark for Your Company?

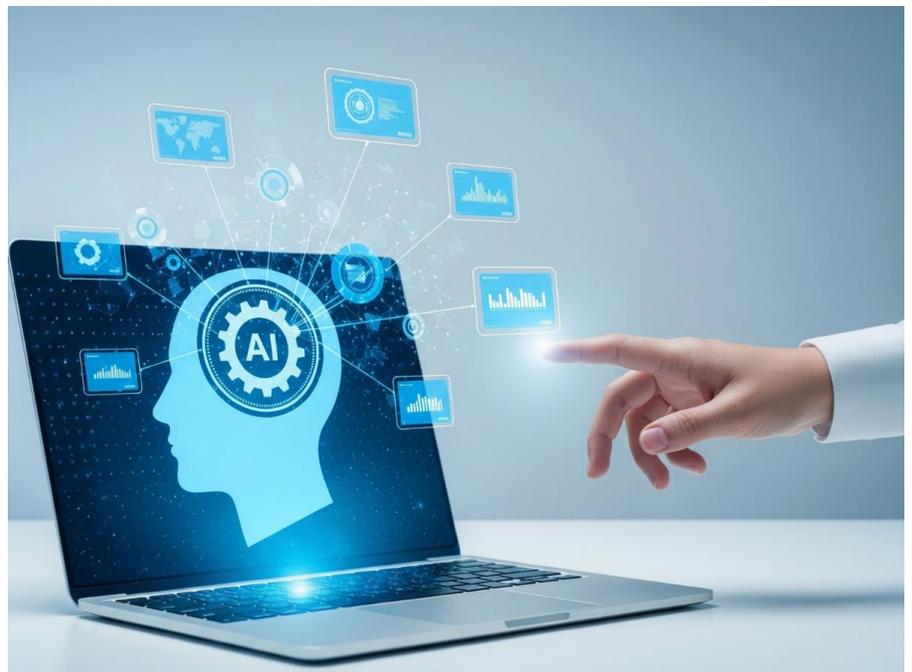

### Results Our Clients Can Expect to See:

- 25–60% reduction in manual processing time
- 15–40% improvement in forecast/demand-planning accuracy
- 90%+ compliance confidence with evolving AI regulations
- Clear path to scale from pilot to enterprise-wide deployment

### Transform Your Business with an Advance2000 AI Opportunity Audit

You know that AI can drive efficiency, cut costs and open new revenue streams, but where do you actually start without risking time, money or compliance?

Advance2000 AI Audit & Integration Service removes the guesswork. In 4–6 weeks, we partner with your team to assess, plan and launch AI solutions that deliver measurable results, safely and sustainably.

## Why Companies Choose Advance2000

- 10+ years combining management consulting and hands-on AI engineering
- Vendor-neutral. We recommend what's truly best for you, not what pays us commission
- Fixed-price audit (no surprise bills)
- PhD data scientists working side-by-side with your team

## What You Get: The 5 Step AI Audit Journey

### Phase I – AI Audit Jumpstart

1. Discovery & Opportunity Scan (Week 1)
  - Interviews with leadership and department heads
  - Process mapping of your core operations
  - Identification of high-impact AI use cases
2. Technical & Data Readiness Assessment (Weeks 2–3)
  - Full audit of your data quality, infrastructure and security posture
  - Gap analysis against leading AI frameworks
  - Risk scoring for bias, explainability and regulatory exposure
3. Prioritized AI Roadmap & ROI Modeling (Week 4)
  - Phased rollout plan
  - Detailed cost-benefit analysis for each initiative
  - Vendor-neutral technology recommendations
  - Phase II POC implementation proposal

### Phase II – AI Proof of Concept / MVP Implementation

4. Proof-of-Concept Build & Test (Weeks 5–6)
  - We build and deploy 1–2 high-priority pilots in your environment
  - Real data, real users, real KPIs measured
5. Integration Playbook & Governance Package
  - Step-by-step deployment guide
  - Custom AI ethics & governance framework

### Phase III – AI Production Implementation
